Proficient Front-End Developer effective at developing strong websites that achieve established objectives. Excellent self-sufficiency and ability to consistently learn new skills and solve new problems as needed.

## Work History

2022-04 -  
Current

### Freelance Web Developer

*Jack Stevens Web Development, Dana Point, CA*

- Working one-on-one with clients through each phase of their project, including a design phase using Figma / Illustrator before building functional websites that best represent their brands and overall goals.

## Projects

### Strong Notes

<https://strong-notes.vercel.app/>

**HTML / CSS / Tailwind / Javascript / React.js / Firebase**

- A weight lifting & workout tracking application w/ database.
- Input individual exercises, save them as a workout, and view a history of all workouts filtered by date.
- Dark / light theme toggle.
- Powered by Firebase.

### Esthetics By Tay

[www.estheticsbytay.com](http://www.estheticsbytay.com)

**HTML / CSS / Javascript / React.js / Styled Components / Figma**

- Worked one on one with a client through a design phase using Figma before building a functional website that they felt best represented their brand.
- Site uses fullPage.js for fullscreen navigation.

### Disaster Tracker

[jacks-disaster-tracker.vercel.app](https://jacks-disaster-tracker.vercel.app)

**HTML / CSS / Javascript / API Fetch / React.js / Next.js / MUI**

- Displays a map of current natural disaster activity using NASA's EONET API.
- Application will fetch new data when user selects a different disaster to view.
- Event icons can be clicked to display a tooltip with more info and a source link if available.
- Includes a donation link for those affected by wildfires.
